Der er tre typer af viden, viden om stof-energi, kendskab til mental energi, og viden om kosmisk energi.

Kosmisk energi arbejder i hver person i form af Guddommelig viden.

Stof i alle former er kun energi.

Uden atomer, kan du ikke have nogen sag, og i atomet, har energi i form af elektron, proton, neutron osv.

Energi udspringer af strukturen af det atomare bestanddel.

There are three types of knowledge; knowledge of matter-energy; knowledge of mental energy; and knowledge of cosmic-energy.

Cosmic energy works in every person in the form of Divine knowledge.

Matter in all forms is only energy.

Without atoms, you cannot have any matter, and in the atom, energy has the form of electron, proton, neutron etc.

Energy springs from the structure of the atomic constituents.
